

Cladding.

Tongue is fixed using the Nailer at right angles to the Cladding, with the locator stop against the edge of the tongue, with the base of the tool against the batten.

The groove is fixed using the Nailer parallel to the board, with the Nailer angled into the groove.

The pressure used to set the Nailers was 100psi.

There is a depth control on the tool, set it so that both tongue fixing nails and the groove fixing nails are left flush with the surface.
